THE NEW ELASTIC SKIS

EFFICIENT FORWARD >>

PRACTICING WAS YESTERDAY, ENJOYMENT IS NOW.

Practice makes perfect – but most of the time it isn't fun. The good feeling of smooth motion is something quite different: this is what makes your time on the track an unforgettable experience! And to make sure this not only happens sooner but also lasts longer, Fischer gives you Efficient Forward. Thanks to the revolutionary composition of proven materials, the elasticity of the body of the ski is increased remarkably. It fills beginners and advanced recreational skiers with enthusiasm, thanks to a forgiving kick action and a new, carefree skiing experience. If you would rather glide with ease than practice hard, then a Fischer Sport model with Efficient Forward is the right choice for you!

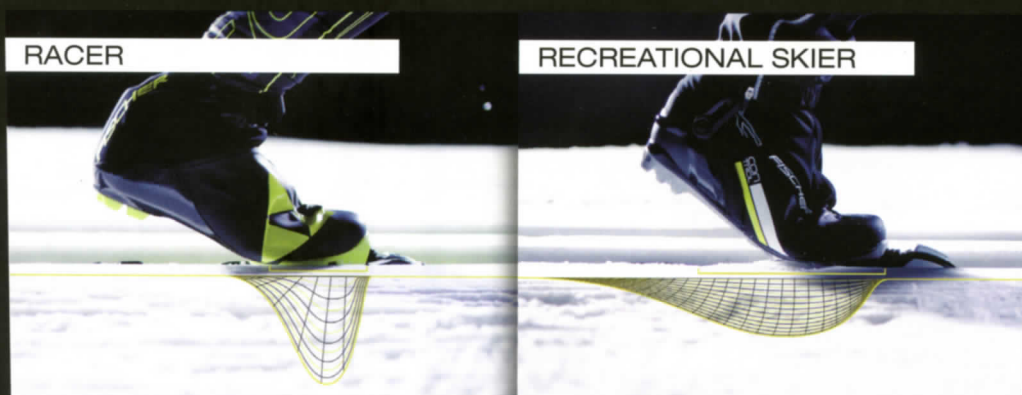

EFFICIENT KICK

Full concentration on the snow-covered winter landscape instead of the kick action! Because Efficient Forward technology compensates any errors and flaws in the kick action effectively. The new elasticity of the ski supports the interaction of the climbing zone and the snow beneath it in a previously unknown form. The result: the timing of the kick action does not have to be so exact, leaving you more time for the contact in the kick phase. This ensures that power is transferred to the track in impressive style, even if your own skiing style is not world championship level. This positive feedback from the equipment is a great motivator when it comes to having fun with healthy exercise while enjoying the great outdoors!

EASY-GOING

Enjoying the perfect skiing experience has never been as easy as it is today: which comes as no surprise, seeing as the weight saved by the new construction compared to the previous model is up to 200 grams. The combination of this light weight and the elasticity of the ski culminates in the whole new, forgiving kick action and carefree cross country skiing experience. This will be appreciated above all by skiers who are not so technically accomplished. A word of warning: with Efficient Forward, Fischer has given its Sport models a technology package which can become addictive!

BECAUSE NOT EVERYONE HAS THE KICK ACTION OF A RACER:

EASIER POWER TRANSMISSION & MORE TIME FOR KICK ACTION:

EFFICIENT KICK

REVOLUTIONARY COMPOSITION & WEIGHT SAVING UP TO 200g:

EASY-GOING

PRACTICING WAS YESTERDAY, ENJOYMENT IS NOW.

Maximum cross country skiing enjoyment is quite simple: a safe pattern of motion and a uniquely smooth feeling are all you need. There is no talk of hard work and practice. At least there isn't when the ski is equipped with Efficient Forward. This technology fills both beginners and advanced recreational skiers with enthusiasm, thanks to a forgiving kick action and a completely new, carefree skiing experience. And the new construction also saves up to 200 grams in weight. What more could a skier ask for?

TWIN SKIN MAKES THE FLEET COMPLETE

THREE TECHNOLOGIES IN ACTION

TWIN SKIN – A WHOLE NEW LEVEL OF SKI PERFORMANCE.

Fischer equipment has been setting the standards on the track for years. With the new Twin Skin Race and Twin Skin Pro skis in addition to the Vario Crown and Zero+ models, Fischer rounds off its range of climbing-waxless skis for sporty cross country skiers.

Two separate skin strips arranged in offset positions and with variable base-depth integration result in smooth and balanced gliding. Mohair skins ensure you can rely on the kick action, especially in hard or icy conditions. Thanks to the unique Teflon coating of the skins, moisture absorption and subsequent icing is completely minimised.

THREE TECHNOLOGIES IN ACTION.

With Twin Skin, Vario Crown and Zero+ Fischer once again has the perfect solution for all temperature and snow conditions! The diagram shows the optimum areas of use for all three technologies. You can see quite clearly not only the all-round suitability of Vario Crown but also the superior performance of Twin Skin in hard or icy conditions. The Zero+ on the other hand is a special ski for temperatures around the 0°C mark and warmer.

SPEEDMAX: NOTHING FOR SLOW MOVERS.

If the goal is full power then the equipment has to be Speedmax. In the World Cup, the name itself is enough to demand the respect of opponents which is then confirmed by the successful Fischer Classic athletes and their impressive results. And the new, ultralight Speedmax boot – which, with the skis and poles, rounds off the high-end package – knows no mercy either. Together with the RACE CODE seal of quality, Speedmax is the guarantee for a breathtaking World Cup feeling.

VARIO CROWN

The newest generation in Crown technology: this cutting pattern which was developed in elaborate tests ensures previously unattained efficiency in motion. In what is perfect interaction with the successful and proven Single and Double Crown units for a direct, powerful kick action, the newly developed Gliding Crown sections with their rounded profile guarantee maximum ease when gliding. The optimum tuning of the climbing and gliding system elements is the secret behind the versatility in use in all snow conditions. Icing up and waxing are a thing of the past for the new Vario Crown.

WIDE BODY TECHNOLOGY

With this special widening in the climbing system zone Fischer gains significant advantages for Nordic Cruisers: more surface area ensures easier climbing and perfect stability. And this stability enables even Nordic Cruisers without technical skills to concentrate fully on enjoying the winter experience.

SPEEDMAX CLASSIC: EXTREMELY LIGHT, EXTREMELY PERFECT

This boot needs no modesty. With the new Speedmax Classic, highly ambitious fans of the classic skiing style now also have a complete high-end package at Speedmax level. The boot has of course also been developed in close collaboration with the Fischer athletes from the World Cup. The result: extremely light and with unparalleled efficiency thanks to the three-dimensional carbon construction with fibres that run diagonally in the sole. The maximum side stability this achieves with a balanced heel-to-toe rolling motion at the same time results in breathtaking power transfer. It is for good reason that people say: The champion takes it all!

INTEGRAL CARBON CHASSIS

The heart of the new Speedmax Classic is a three-dimensional carbon shell. The outer sole, midsole and side stabilisation elements are manufactured from the same sheet of carbon. The perfectly tuned integration of all elements in one chassis offers decisive benefits: previously unattained light weight with optimum stability and power transfer. And everything with a perfect heel-to-toe rolling motion.

XCELERATOR SSR

Two parts for one big performance every time: the split construction enables a 50% saving in weight compared to the single-part Xcelerator sole. Developed for the world's top skiers, the Xcelerator SSR sole forms the perfect entity with the Integral Carbon Chassis.

TECHNOLOGY

FISCHER CLIMATE COMFORT

Feet play a key role in power transfer in the dynamic motion sequences in cross country skiing. And this means that it is all the more important that they have the best possible conditions for this, besides a perfect fit and performance: keeping dry, optimum warmth and a comfortable in-boot climate. And this is precisely what the Fischer development department gives you with its innovative technologies.

FISCHER TRIPLE-F MEMBRANE: FEET CAN TAKE A BREATH

Sport and exercise generate body heat, and this includes your feet. Feet are more likely to become damp this way than through external moisture. This is why Fischer concentrates on efficient moisture transport from the inside to the outside: the boot liner is made of technical mesh material and permeable to air and moisture so that any moisture can be absorbed by the fleece lying on it and wicked away. It is transported to the outside via the breathable outer skin of the boot. The Triple-F membrane keeps out any unwanted effects of the weather. Feet stay warm and dry as a result.

CLEANSPORT NXT: LASTING FRESHNESS INSIDE THE BOOTS

Bacteria forms inside sweat which can lead to unpleasant odours and have a negative impact on even the best of boots. This is why Fischer boot insoles are treated with innovative Cleansport NXT: a natural odor control, leveraging beneficial and microbes which have been bound to the surface of the fabric within the boot liner. These microbes produce enzymes which break down the organic materials that cause odors in your boots, leaving the climate inside your boot fresher and more pleasant.

THE CHAMPION TAKES IT ALL

TECHNOLOGIES REDUCED TO THE MAX.

The Speedmax pole makes the RACE CODE package complete at World Cup level. With components reduced to the maximum, the new top model has everything the racer's heart desires: lighter than light, optimised stiffness and perfect swingweight.

AIR CARBON UHM SHAFT

Even lighter and more stable: the new shaft of the top RACE CODE product. The processing of special, even stronger UHM carbon fibres in the proven 16:9 geometry are responsible for the maximum stiffness and minimised weight.

SPEED STRAP

A firm grip on everything: the newly developed strap does without any unnecessary details and focuses on what is important. With minimised weight and sufficient comfort it offers direct power transfer, perfect pole control and an optimised fit.

RACELITE AERO SMALL BASKET

For more dynamic action: extremely light basket with aerodynamic profile for even better power transfer and impressive lightness when using the pole. The right basket on the pole – so small and so significant.

MULTI TIP SYSTEM

TUNING IN YOUR HANDS

Different snow conditions call for different pole baskets. The softer the ground, the larger the basket should be to enable perfect kick action. Use with roller skis in summer, on the other hand, has different requirements.

In the past the solution was either to own several pairs of poles or the time-consuming removal and reaffixing of the baskets together with the respective tips. The new Multi Tip System, however, enables you to simply screw on the basket you require and thanks to a professional and ingenious locking mechanism it is securely locked in place and cannot turn. This procedure is so easy, you can even change baskets out on the trails if you need to!

NORDIC CRUISING / SPORT

XC SUPERLITE

Article no. Z44016
Lengths 120 - 165 (5cm)

TECHNOLOGY HIGHLIGHTS

- Alu 6013
- Cork Grip
- Comfort Strap

CUSTOMER BENEFIT

- Sporty, lightweight aluminium pole
- Ergonomic grip and comfortable strap
- For ambitious hobby sports enthusiasts

XC CRUISER

Article no. Z43016
Lengths 120 - 165 (5 cm)

TECHNOLOGY HIGHLIGHTS

- Alu 6061
- Comfort Strap
- Racelite Aero Big Basket

CUSTOMER BENEFIT

- Designed for Nordic Cruising
- Comfortable strap
- High-grade aluminium construction

XC PERFORMANCE

Article no. Z44116
Lengths 120 - 165 (5 cm)

TECHNOLOGY HIGHLIGHTS

- Alu 6061
- TPR Grip
- Racelite Aero Big Basket

CUSTOMER BENEFIT

- Good pole guidance
- Sturdy aluminium poles
- For sporty leisure skiers

- Alu 6013
- TRP Junior Grip
- Loop 30 Strap

CUSTOMER BENEFIT

- An all-rounder which is fun
- Clever features
- Sound manufacturing

JUNIOR FIBRE

Article no. Z46515
Lengths 70 - 120 (5cm)

TECHNOLOGY HIGHLIGHTS

- Fibre
- Mono Junior Grip
- Loop 10 Strap

CUSTOMER BENEFIT

- Designed optimally for children's hands
- Robust material
- For a great start in the sport of cross-country skiing

BASE FINISH

FINISH FIRST

The finishing touch now comes from Finish First: the term that covers and unites all the individual technological steps in the course of the final treatment of the base.

DIAMOND TUNED GRINDING (DTG) WORLD CUP PLUS / COLD / UNIVERSAL

PLUS: Deeper and coarser Plus structure, ideal for warm and moist conditions. Produced using natural diamond. COLD: Fine and flat Cold structure, perfect for cold and dry conditions. Produced using a synthetic diamond. UNIVERSAL: Universal structure, ideal for changing conditions. Produced using a natural diamond.

SPEED GRINDING

Universal stone grinding for perfect gliding properties in all snow conditions.

ULTRA TUNING

Unrestricted gliding. Offset base structure makes the ski fast and suitable for all uses.

PREWAXED

Infrared preparation with fluoride-content hot wax. Best gliding properties, protection against dirt and oxidation. Powered by Swix.

SWINGWEIGHT

HOLE SKI TIP

Skating construction with HM carbon laminates to reduce ski tip mass. Requires less effort thanks to reduced pendulum action.

CARBON PRO TIP & TAIL

3D Classic ski tip and tail made of real carbon. Optimum swing behaviour through weight reduction. Can be felt in every Classic stride.

SPEED TIP & TAIL

Special designed ultralight laminates in ski tip and tail mean even less ski weight. The advantage: less inertia and optimised swing weight.

CONSTRUCTIONS

COLD BASE BONDING

The revolution in ski making: Speedmax technology to protect the homogeneous molecular structure of the base for perfect wax absorption. Guarantees maximum speed.

SKATING 115

Special camber and snow contact points further apart from each other mean increased stability and a more powerful kick action on hard snow.

SKATING 610

Skating race ski construction for maximum speed through pressure relief at the ski tip and tail. Perfect on compact to soft snow.

CLASSIC 902

Race ski construction with noticeable pressure relief at the ski tip and tail for a direct, quick and safe kick phase. Ideal for: universal to wet conditions, klister.

CLASSIC 812

Race ski construction with long, dynamic wax pocket pattern for minimum wax loss through friction. Ideal for: cold conditions and dry wax conditions.

EFFICIENT FORWARD

Thanks to the revolutionary composition of proven materials the elasticity of the body of the ski is extremely increased: this guarantees a forgiving kick action and a new, easy-going skiing experience.

CAMBER CLASSIC MY STYLE

Configured lower than its unisex counterpart to account for lighter body weights. Designed for the classic technique with less effort required.

PRECISION PAIRING SYSTEM

The next generation in ski pairing: fully automatic dynamic measurements of a multitude of pairing criteria ensures precise ski choice and optimised pairing.

SIDECUT WORLD CUP

Arrow-shaped sidecut for improved performance and dynamics especially for the 1:1 skating technique.

COMPUTER FLEX CONTROL

Minimises differences in residual tension and camber pressure. Top climbing and kick performance.

FISCHER CARBON FIBRE

Multiaxial T300 1K carbon fibre for ski tip, ski tail and as laminate. Extremely tough and minimum weight.

NORDIC ROCKER CAMBER

Slightly opened ski tips for perfect gliding properties in unprepared terrain. Enables lighter turning with less effort.

WIDE BODY TECHNOLOGY

Widened section in the climbing system zone enhances climbing performance and provides optimum stability for classic style skiing.

RENTAL TAIL PROTECTOR

Special components for extremely robust ski tails ensure they fulfil the durability requirements of ski rental.

POWER LAYER

0.2mm thin, extremely lightweight, full-surface high-pressure laminate comprising natural fibres and resin for noticeable ski weight reduction.

POWER EDGE

Reinforced ski chassis ensures longer service life. Homogeneous pressure distribution ensures uniform wax wear.

STEEL EDGE

Narrow steel edge along the entire length of the ski. Guarantees constant edge contact on every surface.

CORES

AIR CORE HM CARBON

The latest from the World Cup: Proven Air Core material - the most successful ski core with over 80% air content for extremely light weight combined with highly molecular carbon fibres.

AIR CORE CARBONLITE

The lightest material from Fischer: bidirectional Air Core technology with multiaxial carbon fabric for under 500g per ski and top performance.

AIR CORE CARBON

The most successful ski core with over 80% air content for extremely light weight. Optimum performance thanks to torsion-free and break-resistant technology.

AIR CORE BASALITE PRO

Extremely lightweight and torsion-free construction with highly stable sidewalls. Volcanic basalt fibres for minimum weight and perfect flex characteristics regardless of temperature.

AIR CORE BASALITE

Combination of Air Core material and extremely lightweight wood with air channels for efficient weight saving. Basalt fibres for perfect flex characteristics regardless of temperature.

AIR TEC BASALITE

Special air channels in the lightweight wood types reduce weight compared to the Air Channel construction. Basalt fibres for perfect flex characteristics regardless of temperature.

AIR CHANNEL BASALITE

Fibreglass/wood core with integrated air channels to save up to 250g in weight compared to pure wood cores. A further 40g lighter with volcanic basalt fibres.

AIR TEC STEEL EDGE

Air channels combined with new, very light wood types. Weight-optimised core for steel edge skis.

AIR CHANNEL

Air channels integrated into the fibre glass wood core save weight compared to the pure wood cores and are more resistant to breaking. Better area pressure distribution.

CROWN / CLIMBING SYSTEMS

TWIN SKIN

Two separate skin strips arranged in offset positions and with variable base-depth integration result in smooth and balanced gliding. Mohair skins ensure you can rely on the kick action.

VARIO CROWN

The new generation of Crown technology: a combination of Single, Double and Gliding Crown for efficient power transfer and optimum gliding properties.

OFFTRACK CROWN

Climbing system in all terrain, especially away from the prepared tracks and also in difficult terrain conditions. Developed exclusively for Fischer.

FISCHER EASY SKIN

The easiest way to attach climbing skins: combination of adhesion and click-in-place for reliable grip and straightforward attachment and removal.

OFFTRACK CROWN & FISCHER EASY SKIN

Exclusive climbing system combination for steel edge skis. If Offtrack Crown no longer grips in steep terrain, it's time for Fischer Easy Skin. Like a switch-on all-wheel drive.

ZERO+

Three-part roughened base developed for racing for temperatures around 0°C and warmer. Ideal second ski for difficult wax conditions.

TECH FEATURES

WORLD CUP CARBON CUFF 2.0

New ultralight carbon cuff ensures extremely light weight, excellent side stability and best forward freedom of movement.

WORLD CUP CARBON CUFF

Perfect side stability and outstanding freedom of movement longitudinally. Shaped specially for the foot, light as a feather and embedded in soft EVA.

HINGED POLYMER CUFF

Ergonomic molded cuff for remarkable side hold with good freedom of movement to the front and back. Easy to adjust with Velcro fastener. Canting and EVA padding depending on model.

ANKLE SUPPORT CUFF ASC3

Stable at the side, movable forwards: newly developed ankle support with pivot joint for optimum power transfer, individually adjustable thanks to Powerstrap.

INTEGRAL CARBON CHASSIS

Outer sole, insole and side stabilisation elements manufactured from the same sheet of carbon. For previously unattained light weight with optimum stability power transfer.

WORLD CUP CARBON CROSSLINK

External stabilising elements made of high-strength carbon fibres fix the WC Carbon Cuff to the boot, ensuring the high degree of torsional resistance.

POLYMER CROSSLINK

External stabilisation element made of lightweight polymer for the cuff. Ensures high torsional resistance thanks to it being particularly robust.

INJECTED EXTERIOR HEEL CAP

Good heel cradling and robust protection all in one: exterior heel cap for even better power transfer.

INTERNAL MOLDED HEEL CAP

Internal anatomically shaped heel cap. Very light and individually thermoformable.

FISCHER SPEED LOCK SYSTEM

New, revolutionary quick lock with minimum size and weight. Simply pull the laces tight – that's it! The system is safe and reliable.

INSTEP STRAP

Additional outer fastener where the instep is (either with Velcro or ratchet strap). Makes the foot even more secure and enables better power transfer.

THERMO FIT

Thermally formable foam cushioning with outstanding thermal insulation – a perfect fit for the individual shape of the foot.

CANTING

Canting function on both sides, each with two settings. Enables medial and lateral adjustment to the lower leg axis. Height adjustable up to 4mm with special key provided.

EASY ENTRY LOOPS

Practical entry loops and wide-opening designs guarantee that boots can be put on/taken off comfortably.

EXTENDED FIT SYSTEM

The dual insole system can be optimally adapted to growing feet. Additional space is created by removing the additional insole.

INTEGRATED GAITER

Integrated, easily adjustable gaiter for optimum protection in deep snow. Waterproof lightweight material and sealed zip for maximum cross country skiing enjoyment even in untracked terrain.

SEALED ZIPPER

The specially sealed zipper system ensures that any moisture is kept out.

TRIPLE-F MEMBRANE

Special membrane ensures that conditions inside the boot are perfect: dry, warm and breathable.

WOOL-LIKE LINING

Warming lining material with wool for feet that are sensitive to the cold. Ensures feet also stay warm without feeling moist on longer outings.

CLEANSORT NXT

A natural, chemical-free enzyme system that works to control odor on insoles and linings.

COMFORT GUARD

Very lightweight, water-repelling insulation material for additional thermal protection in the forefoot and toe area.

SOLE

XCELERATOR SSR

Two-part construction means 50% saving in weight compared to Xcelerator Sole and forms the perfect entity with Integral Carbon Chassis.

XCELERATOR

Top racing sole for more direct power transfer through neutral foot position. Extremely light with optimised flex and torsional stiffness. Different hardnesses for skating and classic.

R3

Better flex, optimised torsional stiffness, more stability through wide underfoot. Different material hardnesses for skating/classic. PEBAX or PU constructions.

T4 / T3

T4: Pure PU sole with comfortable, softer flex and good walkability.
T3: Better power transfer, optimum flex, comfortable walking.

BC

Optimum support in difficult terrain. Reliable walking thanks to non-slip profile.

VIBRAM® 75 MM

Standard Vibram® 75 sole. Excellent support in difficult terrain. Non-slip profile with specially developed rubber mixture.

BOOT FIT CONCEPT

The right fit for all requirements. Whether it's shaped for the female foot with the comfort or race version, customised for the feet of young skiers, meeting the comfort requirements of all-rounders or for direct power transfer in racing: the Boot Fit Concept with special lasts is the answer to all the different needs and morphologies of the various consumer groups.

TECH FEATURES

CORK LITE GRIP

Ultralight natural cork grip, ergonomically shaped and developed with top athletes. Enables a smooth pole action.

RACE CORK GRIP

Particularly pleasant pole handling thanks to ergonomic grip shape. Grip area extended downwards in high-quality cork.

QUICK CLICK STRAP

Grip strap system with release button for quick release and automatic fixture without having to readjust when inserting the hand again.

SPEED STRAP

New strap reduced to the most important details and for an optimum fit; minimum weight and direct power transfer ensure perfect pole control.

QUICK FIT STRAP

The exclusive strap: the zipper system means you can insert/remove hands fast without altering the perfect fit.

BC STRAP

Shape-retaining strap made of EVA. Adapts to the shape of the hand and, thanks to the memory function, stays wide open for comfortable hand insertion/removal.

MULTI TIP SYSTEM

Locking mechanism for fast and safe pole tip changeover. Available with small and large tip for winter and a summer tip for roller skiing.

RACE LITE AERO SMALL/BIG

Extremely light basket with aerodynamic profile for even better power transfer and impressive lightness when using the pole.

OFFTRACK BASKET

Sporty, large-surface backcountry basket. Ultra-light (only 17g) and swing-optimised. Tip moved forward for efficient motion support.

AIR CARBON UHM SHAFT

New shaft made of special, even stronger UHM carbon fibres in proven 16:9 geometry for maximum stiffness and minimum weight.

ALUMINIUM SHAFT

Shaft made of extremely robust aluminium for a perfect balance between breaking strength and weight. Enables a wide area of use in all pole categories.

AIR LOCK 2.0

New developed, ultralight and easy to operate locking system with excellent holding strength.

Unit 1

- For all nordic binding systems and for unmounted skis too
- Because of slidable plates adaptable for all ski lengths

XC-FIXATION RUBBER (WAX STAND)

Article no. Z91709
Unit 2

XC-ADJUSTING SCREW / HANDLE (WAX STAND)

Article no. Z91809
Unit 1

XC-SPRING (WAX STAND)

Article no. Z91412
Unit 1

XC-CLAMP (WAX STAND)

Article no. Z91512
Unit 2

XC-TEST BOARD

Article no. X19404
Size 240 x 40cm
Material Metal
Unit 1

Using the XC-TEST BOARD is generally a good way of selecting classic and skating skis. This method is indispensable for choosing classic skis with a waxed base. The advantage is that you can choose the ski that ideally matches the customer's weight. You are then also able to see the length of the waxed zone and mark it on the ski.

XC-TEST BOARD HANDLE

Article no. X19604
Material Wood
Unit 1

XC-TEST BOARD ADJUSTING PLATE

Article no. X19504
Material Metal
Unit 1

XC-TEST BOARD BASE FRAME

Article no. X19804
Material Aluminium
Unit 1

- Base frame for the elevation of the test board
- Easier to use for the shop kits

XC-SELECTION BOARD

Article no. W23015
Size 12 x 220cm
Material Metal
Unit 1

With the help of the new XC-SELECTION BOARDS you can determine the wax pocket length and position on classic wax skis without the skier having to stand on the skis. Measuring gauges with different thicknesses can be used to make measuring even more precise for different types of wax.

XC-SELECTION BOARD BASE (ACCESSORY)

Article no. W23115
Size 60 x 60cm
Material Metal
Unit 1

- Accessory for free-standing use
