FISCHERSPORTS.COM

THE CHOICE IS YOURS

We design our skis, boots, and poles to meet your exact needs as a skier. Every Fischer product has specific features and technology to make your skiing exhilarating and enjoyable. It's easy to find the right gear for the skiing that you do. Fischer offers three distinct performance collections of Nordic skis, boots, bindings and poles. Whatever you need, want, and love in Nordic skis and equipment, Fischer makes it easy to find.

low involvement  high involvement

RACE

FITNESS

on-track

RACE

You know who you are. You think in hundredths of a second and individual grams are critical to you. You seek efficiency more than comfort, and speed more than anything. There are complete ranges of high performance equipment for you for race day as well as for the hard training days leading up to it. To see the Fischer Nordic ski and equipment Race collection on display you only need to look at a World Cup race podium.

FITNESS

If you use some faster skiing or you just get of the house onto the snow whenever possible to stay fit, there are two options within the Fitness collection with the technology and designs to match your needs. The Sport collection of equipment and traditional-length skis is designed for skiers who usually stay on prepared tracks to enjoy some energetic skiing. A little speed and a focus on technique are part of their ideal day on the snow. The Cruising collection of mid-length skis and equipment is for skiers who also enjoy a prepared track, with the goal of a relaxing or revitalizing ski session with friends. They appreciate control and stability rather than speed.

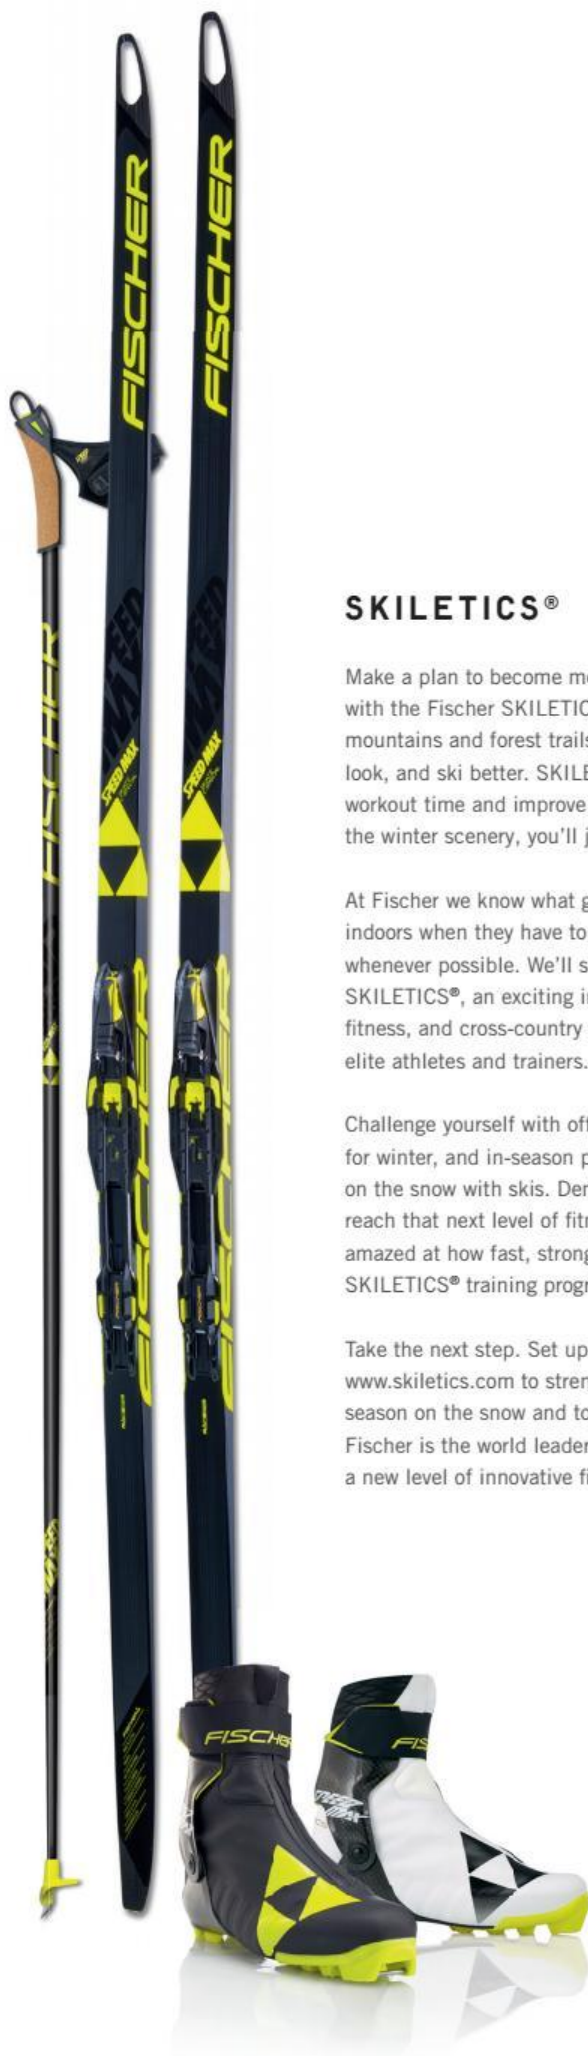

ADVENTURE

If you'll go anywhere for good snow and the challenge of unknown trails, we have the right equipment to make you happy wherever you find that untouched snow. If there are really no limits to your exploring, take a look at the Backcountry family of Adventure skis, boots, and poles. Expedition tested and tough for skiers who push the limits of themselves and their gear. Where the goal is to experience ungroomed forest trails and challenging hills starting from your own backyard, the reliable Offtrack Cruising family of mid-length Adventure skis and equipment will get you up, down, and back in safety and comfort.

SKILETICS®

SKILETICS® —
TEMPERATURE
DOWN, HEART
RATE UP.

SKILETICS®

Make a plan to become more fit than you've ever been this winter with the Fischer SKILETICS® total body conditioning program. The mountains and forest trails are your own personal health club to feel, look, and ski better. SKILETICS® is the modern way to maximize workout time and improve your cross-country skiing. You can still enjoy the winter scenery, you'll just be going past it much faster!

At Fischer we know what gets results for today's athletes. They train indoors when they have to, but they train outdoors on skis and snow whenever possible. We'll share this knowledge with you through SKILETICS®, an exciting innovation in training for strength, overall fitness, and cross-country ski technique, developed by our team of elite athletes and trainers.

Challenge yourself with off-season programs to get you lean and fit for winter, and in-season programs to improve power and conditioning on the snow with skis. Demanding workouts will help hardcore skiers reach that next level of fitness and performance. Beginners will be amazed at how fast, strong, and smooth they feel on skis after using a SKILETICS® training program designed for them.

Take the next step. Set up a regular workout to fit your schedule at www.skiletics.com to strengthen legs, arms, and core for a fantastic season on the snow and to reach your own year-round fitness goals. Fischer is the world leader in cross-country ski gear. Let us lead you to a new level of innovative fitness training with SKILETICS®.

ONLY THE BEST.

World Cup racers value maximum performance with minimal weight. Their only question is what makes them faster? The answer to that question is Speedmax. Exclusive materials, integrating top technology, and obsessive attention to weight reduction make these the fastest skis and gear on the planet.

The Speedmax Skating collection of high speed skis, poles, and boots is designed for pro skiers and those with a pro-level commitment to training and racing. The Fischer Race Code seal means the product in the shop is the same as on the World Cup course.

TWIN SKIN MAKES THE FLEET COMPLETE.

Fischer equipment has been setting the standards on the track for years. With the Twin Skin skis in addition to the Vario Crown models, Fischer rounds off its range of climbing-waxless skis for sporty cross country skiers.

TWO SEPARATE SKIN STRIPS

result in smooth and balanced gliding.

MOHAIR / MOHAIR MIX SKINS

ensure you can rely on the kick action, especially in hard or icy conditions.

Thanks to THE UNIQUE TEFLON

coating of the skins, moisture absorption and subsequent icing is completely minimised.

EVERY TENTH OF A SECOND COUNTS.

World Cup racers value maximum performance with minimal weight. Their only question is what makes them faster? The answer to that question is Speedmax. Exclusive materials, integrating top technology, and obsessive attention to reducing weight make these the fastest skis and gear on the planet.

The Speedmax Classic collection of high speed skis, poles, and boots is designed for pro skiers and those with a pro-level commitment to training and racing. The Fischer Race Code seal means the product in the shop is the same as on the World Cup course.

THE EASIEST WAY TO ATTACH CLIMBING SKINS

Fischer Easy Skin: Combination of adhesion and click-in-place for reliable grip and straightforward attachment and removal.

NO TRACK NEEDED.

When it snows, be ready to go. Skiers who like to leave the house for the snow whenever possible look to Offtrack Cruising skis to make every winter day a Nordic ski day. Experienced skiers know beyond every uphill there might be a sweeping downhill or yet another uphill. When it's time to climb, Offtrack Crown models mean easy gliding skis can also handle the hills. Offtrack Cruising skis are mid-length for easy handling and stopping on ungroomed snow.

GO YOUR OWN WAY.

When it snows, be ready to go. Skiers who like to leave home for the open snow whenever possible look to Backcountry skis to make every winter day a Nordic ski day. More adventurous skiers know beyond every uphill there might be a sweeping downhill or yet another uphill. When it's time to climb, Easy Skin models mean easy gliding skis can also handle the hills. Reliable, traditional length Backcountry skis are designed to give confidence in any conditions to local tourers as well as Polar explorers.

THE NEXT GENERATION.

The focus for junior skiers is on fun and movement. Going faster is always more fun so junior equipment is based on the designs and technologies of the top performance equipment, offered in a lighter weight version. Even the colors and designs are the same. Learning excellent technique with excellent equipment is the best way for young skiers to develop a lifelong love of Nordic skiing and racing.

GET CONNECTED

The binding is the most important link in the Nordic ski setup. Transferring power efficiently from the boot to the ski means smoother, faster skiing with less effort. Always seeking the best for winter athletes, Fischer is proud to offer an innovative range of Nordic bindings, binding plates, and boot soles under the TURNAMIC® brand to deliver a higher level of performance. TURNAMIC® bindings and soles are compatible with the globally recognized NNN®* profile.

This range brings groundbreaking innovations to Nordic skiers of all ability levels. They are intuitive and easy to use, meaning efficiency and speed for advanced skiers, and convenience for recreational skiers.

EASY

What makes the TURNAMIC® setup so compelling is its ease of use. The lightweight bindings quickly slide onto the plate without the need for tools. When it's time to ski, the Turn Lock mechanism can be easily operated even with a gloved hand. Entry and exit in any situation are now as simple as the turn of an easily accessed lever.

TUNABLE

Technique, temperature, and snow composition all have an influence on ski performance. All TURNAMIC® models offer completely tool free adjustment and fine tuning for individual needs. Simply slide the binding forward for more grip, or slide it rearward to improve glide and speed. Entry-level skiers and World Cup racers all enjoy the same easy tuning benefits.

DYNAMIC

The TURNAMIC® boot-binding-plate-ski setup provides unmatched dynamic skiing performance. The FLOWFLEX® design enables the ski to flex more freely. This gives serious skiers and racers more efficient power transfer for more speed, while recreational skiers will enjoy improved smoothness and control.

* NNN® is a registered trademark of the company Rottefella AS, Norway

FISCHER CLIMATE COMFORT

TRIPLE-F MEMBRANE

The Triple-F Membrane keeps water and snow from entering boots, while allowing excess heat and moisture vapor to escape. The climate inside the boot stays warm and dry, no matter what the outside climate is.

COMFORT GUARD

Inside the boot, a light, thin layer of water-repellent insulation material offers additional thermal protection in the forefoot and toe area to keep the skiers warm as they glide through the snow.

FISCHER FRESH

All skiers want their favorite boots to last as long as possible and stay pleasant to wear season after season. The other key component of Fischer Climate Comfort is the Fischer Fresh treatment, which reduces odor and protects the inside of the boot for long-lasting comfort and use.

WATERPROOF

For Nordic skiers who value total moisture protection and warmth above all else, Fischer has Backcountry boots with integrated gaiters and fully waterproof construction for dry feet on even the wettest, coldest days.

XC-CLAMP (WAX STAND)

Article no. Z91512
Unit 2

XC-TEST BOARD

Article no. X19404
Size 240 x 40cm
Material Metal
Unit 1

Using the XC-TEST BOARD is generally a good way of selecting classic and skating skis. This method is indispensable for choosing classic skis with a waxed base. The advantage is that you can choose the ski that ideally matches the customer's weight. You are then also able to see the length of the waxed zone and mark it on the ski.

XC-TEST BOARD HANDLE

Article no. X19604
Material Wood
Unit 1

XC-TEST BOARD ADJUSTING PLATE

Article no. X19504
Material Metal
Unit 1

XC-TEST BOARD BASE FRAME

Article no. X19804
Material Aluminium
Unit 1

- Base frame for the elevation of the test board
- Easier to use for the shop kits

XC-SELECTION BOARD

Article no. W23015
Size 12 x 220cm
Material Metal
Unit 1

With the help of the XC-SELECTION BOARDS you can determine the wax pocket length and position on classic wax skis without the skier having to stand on the skis. Measuring gauges with different thicknesses can be used to make measuring even more precise for different types of wax.

XC-SELECTION BOARD BASE (ACCESSORY)

Article no. W23115
Size 60 x 60cm
Material Metal
Unit 1

- Accessory for free-standing use

BASE FINISH

FINISH FIRST

The finishing touch comes from Finish First: the term that covers and unites all the individual technological steps in the course of the final treatment of the base.

DIAMOND TUNED GRINDING (DTG) WORLD CUP PLUS / COLD / PLUS COARSE

PLUS: Optimised Plus grinding finish from the World Cup with universal range of use. It is suitable for all types of snow and ensures the best speed in a wide range of temperature. COLD: Cold grinding finish from the World Cup. The very flat structure is best suited for very cold temperature and particularly fine snow conditions. PLUS COARSE: Special grinding finish from the World Cup. The deeper and coarser structure is perfectly suitable for coarse-grained and moist snow at temperatures of 0°C and warmer.

SPEED GRINDING

Universal stone grinding for perfect gliding properties in all snow conditions.

ULTRA TUNING

Unrestricted gliding. Offset base structure makes the ski fast and suitable for all uses.

PREWAXED

Prepared with fluoride-content wax. Best gliding properties, protection against dirt and oxidation. Powered by Vauhti.

SWINGWEIGHT

HOLE SKI TIP

Skating construction with HM carbon laminates to reduce ski tip mass. Requires less effort thanks to reduced pendulum action.

CARBON PRO TIP & TAIL

3D Classic ski tip and tail made of real carbon. Optimum swing behaviour through weight reduction. Can be felt in every Classic stride.

SPEED TIP & TAIL

Special designed ultralight laminates in ski tip and tail mean even less ski weight. The advantage: less inertia and optimised swing weight.

CONSTRUCTIONS

COLD BASE BONDING

The revolution in ski making: Speedmax technology to protect the homogeneous molecular structure of the base for perfect wax absorption. Guarantees maximum speed.

SKATING 115

Special camber and snow contact points further apart from each other mean increased stability and a more powerful kick action on hard snow.

SKATING 610

Skating race ski construction for maximum speed through pressure relief at the ski tip and tail. Perfect on compact to soft snow.

CLASSIC 902

Race ski construction with noticeable pressure relief at the ski tip and tail for a direct, quick and safe kick phase. Ideal for: universal to wet conditions, klister.

CLASSIC 812

Race ski construction with long, dynamic wax pocket pattern for minimum wax loss through friction. Ideal for: cold conditions and dry wax conditions.

DOUBLE POLING

Special double poling construction. Uniting the benefits of the Skating with those of the Classic construction for a noticeable increase in power when double poling.

EFFICIENT FORWARD

Thanks to the revolutionary composition of proven materials the elasticity of the body of the ski is extremely increased: this guarantees a forgiving kick action and a new, easy-going skiing experience.

PRECISION PAIRING SYSTEM

The next generation in ski pairing: fully automatic dynamic measurements of a multitude of pairing criteria ensures precise ski choice and optimised pairing.

SIDECUT WORLD CUP

Arrow-shaped sidecut for improved performance and dynamics especially for the 1:1 skating technique.

COMPUTER FLEX CONTROL

Minimises differences in residual tension and camber pressure. Top climbing and kick performance.

FISCHER CARBON FIBRE

Multiaxial T300 1K carbon fibre for ski tip, ski tail and as laminate. Extremely tough and minimum weight.

NORDIC ROCKER CAMBER

Slightly opened ski tips for perfect gliding properties in unprepared terrain. Enables lighter turning with less effort.

HYBRID®

The special combination of two different technologies offers surface and sidewall protection against mechanical influences and enormously improved design possibilities.

RENTAL TAIL PROTECTOR

Special components for extremely robust ski tails ensure they fulfil the durability requirements of ski rental.

POWER LAYER

0.2mm thin, extremely lightweight, full-surface high-pressure laminate comprising natural fibres and resin for noticeable ski weight reduction.

POWER EDGE

Reinforced ski chassis ensures longer service life. Homogeneous pressure distribution ensures uniform wax wear.

STEEL EDGE

Narrow steel edge along the entire length of the ski. Guarantees constant edge contact on every surface.

CORES

AIR CORE HM CARBON

The latest from the World Cup: Proven Air Core material - the most successful ski core with over 80% air content for extremely light weight combined with highly molecular carbon fibres.

AIR CORE CARBONLITE

The lightest material from Fischer: bidirectional Air Core technology with multiaxial carbon fabric for under 500g per ski and top performance.

AIR CORE CARBON

The most successful ski core with over 80% air content for extremely light weight. Optimum performance thanks to torsion-free and break-resistant technology.

AIR CORE BASALITE PRO

Extremely lightweight and torsion-free construction with highly stable sidewalls. Volcanic basalt fibres for minimum weight and perfect flex characteristics regardless of temperature.

AIR CORE BASALITE

Combination of Air Core material and extremely lightweight wood with air channels for efficient weight saving. Basalt fibres for perfect flex characteristics regardless of temperature.

AIR TEC BASALITE

Special air channels in the lightweight wood types reduce weight compared to the Air Channel construction. Basalt fibres for perfect flex characteristics regardless of temperature.

AIR CHANNEL BASALITE

Fibreglass/wood core with integrated air channels to save up to 250g in weight compared to pure wood cores. A further 40g lighter with volcanic basalt fibres.

AIR TEC STEEL EDGE

Air channels combined with new, very light wood types. Weight-optimised core for steel edge skis.

AIR CHANNEL

Air channels integrated into the fibre glass wood core save weight compared to the pure wood cores and are more resistant to breaking. Better area pressure distribution.

CROWN / CLIMBING SYSTEMS

TWIN SKIN

Two separate skin strips arranged in offset positions and with variable base-depth integration result in smooth and balanced gliding. Mohair / Mohair mix skins ensure you can rely on the kick action.

VARIO CROWN

The new generation of Crown technology: a combination of Single, Double and Gliding Crown for efficient power transfer and optimum gliding properties.

OFFTRACK CROWN

Climbing system in all terrain, especially away from the prepared tracks and also in difficult terrain conditions. Developed exclusively for Fischer.

FISCHER EASY SKIN

The easiest way to attach climbing skins: combination of adhesion and click-in-place for reliable grip and straightforward attachment and removal.

OFFTRACK CROWN & FISCHER EASY SKIN

Exclusive climbing system combination for steel edge skis. If Offtrack Crown no longer grips in steep terrain, it's time for Fischer Easy Skin. Like a switch-on all-wheel drive.

TECH FEATURES

WORLD CUP CARBON CUFF 2.0

New ultralight carbon cuff ensures extremely light weight, excellent side stability and best forward freedom of movement.

WORLD CUP CARBON CUFF

Perfect side stability and outstanding freedom of movement longitudinally. Shaped specially for the foot, light as a feather and embedded in soft EVA.

HINGED POLYMER CUFF

Ergonomic molded cuff for remarkable side hold with good freedom of movement to the front and back. Easy to adjust with Velcro fastener. Canting and EVA padding depending on model.

ANKLE SUPPORT CUFF ASC3

Stable at the side, movable forwards: newly developed ankle support with pivot joint for optimum power transfer, individually adjustable thanks to Powerstrap.

EXTERNAL ANKLE SUPPORT EAS

Anatomical ankle support for a stable hold and power transfer for either skiing technique. Individually adjustable through Powerstrap.

INTEGRAL CARBON CHASSIS

Outer sole, insole and side stabilisation elements manufactured from the same sheet of carbon. For previously unattained light weight with optimum stability power transfer.

CARBON HEEL COUNTER

Heel counter made of high-quality carbon fibres. It holds the World Cup Carbon Cuff on the one hand and gives you an optimum heel fit and robust protection on the other.

POLYMER CROSSLINK

External stabilisation element made of lightweight polymer for the cuff. Ensures high torsional resistance thanks to it being particularly robust.

INJECTED EXTERIOR HEEL CAP

Good heel cradling and robust protection all in one: exterior heel cap for even better power transfer.

INTERNAL MOLDED HEEL CAP

Internal anatomically shaped heel cap. Very light and individually thermoformable.

FISCHER SPEED LOCK SYSTEM

New, revolutionary quick lock with minimum size and weight. Simply pull the laces tight – that's it! The system is safe and reliable.

INSTEP STRAP

Additional outer fastener where the instep is (either with Velcro or ratchet strap). Makes the foot even more secure and enables better power transfer.

THERMO FIT

Thermally formable foam cushioning with outstanding thermal insulation – a perfect fit for the individual shape of the foot.

EASY ENTRY LOOPS

Practical entry loops and wide-opening designs guarantee that boots can be put on/taken off comfortably.

GAITER RING

Fastening for all popular gaiter models for additional protection against the snow and wet conditions.

EXTENDED FIT SYSTEM

The dual insole system can be optimally adapted to growing feet. Additional space is created by removing the additional insole.

VELCRO STRAP

Fastening element for cuffs and instep straps, easy to handle and adjust.

RATCHET LOCK BUCKLE

Fastening element for cuffs and instep straps featuring fine ratchet adjustment and stretch-free power transfer.

TRIPLE-F MEMBRANE

Special membrane ensures that conditions inside the boot are perfect: dry, warm and breathable.

WATERPROOF

Waterproof boot design in which the breathable membrane is connected to the lining to ensure a long-lasting, perfect in-boot climate.

LACE COVER

Lace covers for additional protection against the snow and wet conditions and to give you a comfortable warm feeling.

INTEGRATED GAITER

Integrated, easily adjustable gaiter for optimum protection in deep snow. Waterproof lightweight material and sealed zip for maximum cross country skiing enjoyment even in untracked terrain.

SEALED ZIPPER

The specially sealed zipper system ensures that any moisture is kept out.

FISCHER FRESH

Fischer Fresh puts an end to unpleasant odours, giving you lasting freshness inside the cross country skiing boot with a pleasant smell and feeling inside.

COMFORT GUARD

Very lightweight, water-repelling insulation material for additional thermal protection in the forefoot and toe area.

THERMO INSOLE

Insole with fleecy top layer and aluminium-lined lower layer for ideal insulation to keep out the cold.

LEATHER UPPER

Natural upper material made of real leather which has been treated a number of times. Follow enclosed care instructions.

SOLE

TURNAMIC® RACE SKATE

Extremely sporty skating sole made from Pebax® or Desmopan®. Chassis made of hard material for better power transfer. Arch support for stability and extra torsional stiffness.

TURNAMIC® RACE CLASSIC

Extremely sporty classic sole made from Pebax® or Desmopan® gives you a lower stand height for more stability. Flex grooves and soft sole flex support the smooth kick.

TURNAMIC® PERFORMANCE

The robust and flat construction for sporty, classic style skiing enables a longer gliding phase through easier balance. 2K-Desmopan® material mix for improved performance.

TURNAMIC® TOURING

The flat construction enables a safe walk and good balance on the skis. The profile is non-slip and self-cleaning. The wear-resistant 1K-Desmopan® material mix is long-lasting and acts against the cold.

TURNAMIC® JUNIOR

The flat, robust construction enables a good stance and easier balance. The profile is non-slip, self-cleaning and Desmopan® acts as an insulation layer against the cold.

ROTTEFELLA® BC

Optimum support in difficult terrain. Reliable walking thanks to non-slip profile.

SNOW GRIP

Non-slip rubber sole with good thermal insulation for use on winter boots.

SNOW GRIP XL

Non-slip rubber sole, particularly broad, good thermal insulation.

BOOT FIT CONCEPT

The right fit for all requirements. Whether it's shaped for the female foot with the comfort or race version, customised for the feet of young skiers, meeting the comfort requirements of all-rounders or for direct power transfer in racing: the Boot Fit Concept with special lasts is the answer to all the different needs and morphologies of the various consumer groups.

TECH FEATURES

INTEGRATED FIXATION PLATE (IFP)

Modern interface for screw-free binding mounting on the ski. The two-part "Integrated Fixation Plate" is weight-optimised and enables you to adjust ski performance without tools in 7 click-in settings. The IFP also enables individual fine-tuning by sliding the binding backwards and forwards. This means it is possible to influence ski performance any time and any place according to skiing style and snow and track conditions.

TURN LOCK

The ergonomic design of the lever with secure-grip soft components enables intuitive handling when stepping in and out of the binding. Haptic and acoustic response when opening and closing. Protected against unwanted opening.

TOOL FREE

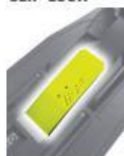

No tools are required for mounting and assembly and this is optimised for easy handling even in difficult conditions on the track. A clearly visible display in the windows next to the setting unit and the click-in presetting make positioning even easier.

DOUBLE LOCK SLIDER

Double locking clip for easy and safe fixation and adjustment of the binding on the IFP (Integrated Fixation Plate).

CLIP LOCK

Clip for easy fixation and adjustment of the binding on the IFP (Integrated Fixation Plate).

FLOWFLEX®

The two-part plate and click-in setting with two closely arranged pins not only guarantees double the safety but also that the binding is fixed on one point. The rest of the binding housing has a floating bearing design along the entire length which has no negative effect on ski performance.

TORSION-PROOFED BODY

The well-thought-out (in all details) housing construction with broad contact surface and torsionally stiff geometry is the basis for direct power transfer. Previously unattained ski control and forward thrust go hand in hand with low weight.

STABILIZER

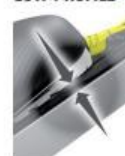

The shape of the Race Pro Skate housing keeps the ski balanced horizontally after every kick. Perfect ski control – even when the ski is in the air.

HEEL PRE-ADJUST

Adjustable heel section where the boot size is preselected using snap hooks on the heel rails. The heel is automatically positioned with it when the position is adjusted so no separate adjustments are necessary later.

LOW PROFILE

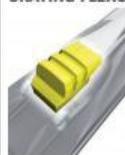

The minimalistic design height ensures a low stand position and maximum stability as a result. This means a more stable gliding phase and a direct feel of the snow at the same time.

STEP-IN

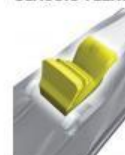

The Step-In mechanism makes it extremely easy to step into the binding. You can hear a clear 'click' when the binding is closed properly.

SKATING FLEXOR

Flexor developed for skating style with flex grade 11.0 and progressive power flow. Pre-load technology ensures the best ski control from the beginning of the motion. 40° working angle (amplitude), tool-free changeover, secure fit inside binding housing and low-wear material are what make this high-performance absorber stand out.

CLASSIC FLEXOR

Flexor developed for classic style with flex grade 7.0 and slightly progressive power flow. Pre-load technology ensures the best ski control from the beginning of the motion. 45° working angle (amplitude), tool-free changeover, secure fit inside binding housing and low-wear material are what make this high-performance absorber stand out.

TECH FEATURES

CORK LITE AERO GRIP

The Cork Lite Aero Grip is a light grip made of natural cork. Ergonomically shaped and developed with top athletes. Enables a smooth pole action.

TPR 2.0 GRIP

Two-component grip for comfort and stability in any weather. Enlarged grip with structured surface lets the hand find and maintain the perfect position. Softer material grips well in wet and cold.

QUICK CLICK STRAP

Grip strap system with release button for quick release and automatic fixture without having to readjust when inserting the hand again.

SPEED STRAP

Completely reduced hand strap with minimum weight and direct power transfer for perfect pole guidance. With integrated rubber band for an optimum fit.

QUICK FIT STRAP 2.0

Exclusive hand strap with zip system for quick entry and exit. Additionally, the improved fit optimises power transfer.

RACE STRAP

This air-permeable and breathable strap offers a pleasant mixture of comfort, fit and sportiness. For good power transfer and pole control.

MULTI TIP SYSTEM

Locking mechanism for fast and safe pole tip changeover. Available with small and large tip for winter and a summer tip for roller skiing.

RACE LITE AERO SMALL/BIG

Extremely light basket with aerodynamic profile for even better power transfer and impressive lightness when using the pole.

OFFTRACK BASKET

Sporty, large-surface backcountry basket. Ultra-light (only 17g) and swing-optimised. Tip moved forward for efficient motion support.

AIR CARBON UHM SHAFT

New shaft made of special, even stronger UHM carbon fibres in proven 16:9 geometry for maximum stiffness and minimum weight.

ALUMINIUM SHAFT

Shaft made of extremely robust aluminium for a perfect balance between breaking strength and weight. Enables a wide area of use in all pole categories.

AIR LOCK 2.0

New developed, ultralight and easy to operate locking system with excellent holding strength.

TECH FEATURES

AIR CORE COMPOSITE

This frame offers an unparalleled ski-like feeling. The vibrations which occur during use are optimally absorbed which makes for extremely smooth performance.

RAZOR SHAPE BASE

The tapered bottom design found on all Carbonlite models maximizes ground clearance especially for the extreme push-off angles of skate skiers.

PRIMETEX®

Very thin and tightly woven carbon fabric. This means that less resin is required in processing. The result is a clear reduction in weight in the frame design.

ALUMINIUM FRAME

Very robust and torsionally stiff aluminium frame which also delivers optimum weight performance at the same time. Runs very smoothly as a result with optimum stability when rollerskiing.

PRECISION DRIVE

All components used for the wheel bearing assemblies are fabricated with minimised tolerances. The precision achieved as a result is the basis for smooth performance and long service.

SPLASH GUARD 80

Newly developed splash protection for all wheels (ø 80mm). The very light and robust plastic part can be added/removed easily with just one screw.

SPLASH GUARD 100

Newly developed splash protection for all wheels (ø 100mm). The very light and robust plastic part can be added/removed easily with just one screw.

FULL RUBBER WHEEL

Solid rubber wheel (ø 80 & 100mm) offers durability for classic or skating, especially on rough surfaces. Better cushioning and less vibration help ride quality.

LOW PROFILE WHEEL

The all-rubber wheel with aluminium (ø 100mm) rim offers optimum grip on surfaces for a powerful kick action. The wheel also has perfect damping characteristics with very good weight performance.

EASY CARE & WAX

CARE BOTTLES

EASY ANTI ICE LF

FOR CROWN & PROFOIL PRODUCTS

Article no. C00017
Size 80ml
Unit 12

- Reduces icing effectively
- Easy to use
- For moist new snow and changing snow conditions

EASY ANTI ICE SKIN HF

FOR ALL SKIN SKIS

Article no. C00217
Size 80ml
Unit 12

- No negative effect on skin glue adhesion
- Reduces icing effectively
- For moist new snow and changing snow conditions
- Developed for skin skis

HYDRO-CARBONS FREE

CLEAN BOTTLES

EASY BASE CLEANER

FOR ALL SKI BASES

Article no. C00117
Size 80ml
Unit 12

- Perfect ski care
- Improved ski performance
- Basis for better wax absorption
